

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Noyes's College Text-Book of Chemistry

By W. A. NOYES, Professor in the University of Illinois
336 pages of text. 12mo

This *College Textbook of Chemistry* is designed, more especially, for students of the freshman or sophomore years in college who have not studied chemistry in high school. It is considerably briefer than the author's previous *Text-book of Chemistry*, and its style is exceptionally clear and simple.

As with all textbooks for beginners, two purposes have been constantly kept in mind while writing the book: the presentation of a few of the multitude of chemical facts which touch our modern life, in such a manner that they can be clearly understood, and the discussion of the theories and principles around which all our chemical knowledge is grouped.

The teacher of chemistry is embarrassed by the vast and ever increasing amount of knowledge at his disposal and is often tempted to present many more topics than the student can possibly remember. In trying to avoid this difficulty many facts ordinarily included in an elementary textbook have been omitted and those which are given are brought as far as possible into close logical relations.

The summary at the close of each chapter is a somewhat unusual feature of the book. It is hoped that these summaries will be found useful.

Success in the study of chemistry depends especially on the ability to learn new facts in their relation to those which have already been acquired and on the cultivation of a logical as distinguished from an arbitrary memory. The exercises at the close of each chapter and questions occasionally inserted in the text are designed to assist the student in this direction.

The Society of Nations

ITS PAST, PRESENT, and POSSIBLE FUTURE

By T. J. LAWRENCE, LL.D., J.P.

Crown 8vo. ($8\frac{1}{4} \times 5\frac{1}{2}$), pp. xi+194. Net \$1.50

A full account of the relations subsisting between independent states enabling the general reader to form reasonable conviction with regard to the possibilities of improvement. The author indicates that the fundamental factor in the whole complicated problem now before the nations is moral and spiritual. He was formerly professor of international law at the University of Chicago and has written a number of books on international law, which are widely used in colleges.

CONTENTS—The Origin of International Society; The Growth of International Society; International Society in July, 1914; The Partial Overthrow of International Law; Conditions of Reconstruction; Rebuilding of International Society.

A Republic of Nations

A Study of the Organization of a Federal League of Nations based on the Constitution of the United States. By RALEIGH C. MINOR. 8vo ($8\frac{1}{4} \times 5\frac{1}{2}$), pp. 349. Net \$2.50

"A book that must be read by every serious student of the most important issue now before the world."

—N. Y. Eve. Post.

"A convincing and practical presentation of a plan which will be of the utmost interest to all thoughtful readers."—The Independent.

"The introduction alone is worth the price of the book."—Chicago Daily News.

James Madison's Notes of Debates

In the Federal Convention of 1787 and Their Relation to a More Perfect Society of Nations. Edited by JAMES BROWN SCOTT. 8vo (9x6), 167 pages. Net \$2.00

Dr. Scott, the eminent international lawyer, argues convincingly that the United States has furnished to the world a League of Nations. The Federal Convention faced as colossal a task as that which confronts the Peace Conference, and solved practically the same problems.

"Of the utmost value at the present juncture."

—The Sun.

"Will afford material for argument as well as for thought to both those who favor and those who oppose the League of Nations."—N. Y. Tribune.

The Congress of Vienna, 1814-1815

By C. K. WEBSTER. 8vo ($8\frac{1}{4} \times 5\frac{1}{2}$), pp. 174, with a map, chronological table and eight appendices, paper. \$2.00

The first standard history of the Congress of Vienna. Of particular value at this time as a guide in the settlement of some of the problems now before the peoples of the world.

The Turks of Central Asia

In History and at the Present Day: an Ethnological Inquiry into the Pan-Turanian Problem, and Bibliographical Material relating to the Early Turks and the present Turks of Central Asia, by M. A. CZAPLICKA. 8vo ($9\frac{1}{4} \times 5\frac{3}{4}$), pp. 242, with a map, appendices, and extensive bibliographical material. \$6.75

The European Commonwealth

Problems Historical and Diplomatic, by J. A. R. MARRIOTT, author of *The Eastern Question*. 8vo ($9\frac{1}{4} \times 5\frac{3}{4}$), pp. xii+370. Net \$7.50

A new book dealing with the rise of modern diplomacy, the Hohenzollern traditions, the problems of Poland, the Near East and the Adriatic, and the Holy Alliance and the Concert of Europe.

Labour and Industry in Australia

From the first settlement in 1788 to the establishment of the Commonwealth in 1901, by T. A. COGHLAN. Four volumes. 8vo ($8\frac{1}{4} \times 5\frac{1}{2}$). Vol. I, pp. viii+588; Vol. II, pp. vi+589-1185; Vol. III, pp. 1186-1790; Vol. IV, pp. 1791-2450. \$33.00

A history of the Labour movements in Australia from the first beginning of the colony to the foundation of the Commonwealth in 1901. It is divided chronologically into seven books, each book dealing exhaustively with questions of immigration, land legislation, prices and political action of its period. The author was for years Agent General for New South Wales.

The Emperor Lucius Septimius Severus

By MAURICE PLATNAUER. 8vo ($8 \times 5\frac{1}{4}$), pp. viii+222. \$5.40

The reign of Septimius is an important, if not a crucial one in the history of the later Roman Empire. So far no account has appeared in English of one whom Bacon, with some show of reason, has called "the ablest Emperour almost of all the liste."—Preface.

Poems of Gerard Manley Hopkins

Now first published. Edited with notes by ROBERT BRIDGES, Poet Laureate. Crown 8vo ($7\frac{3}{4} \times 5$), with six illustrations. Paper board, cloth back. Net \$5.65

The Poet Laureate's Notes are critical and explanatory. He explains the poet's peculiar prosody and under the two heads of oddity and obscurity censures his faults of style, but observes that where he is simple and straightforward in his rhyme he is a master of it.

The Pronunciation of Standard English in America

By GEORGE PHILIP KRAPP, Prof. of English, Columbia Univ. Crown 8vo ($7\frac{3}{4} \times 5$), pp. xv+235. \$1.50

The purpose of this book is to provide a rational method of examining pronunciation, and the principal aspects of speech. The phonetic alphabet of the International Phonetic Association is used as a basis throughout.

Characters

From the Histories and Memoirs of the Seventeenth Century, with an essay on The Character, and historical notes by DAVID NICHOL SMITH. Crown 8vo ($7\frac{1}{2} \times 5$), pp. lii+332. \$2.70

There are seventy-six characters taken from Clarendon, Burnet, Thomas Fuller, Aubrey, Sir Philip Warwick, and many others.

At all Booksellers or from the Publishers. Postage Extra

An Important Contribution to the Literature of Science

A Short History of Science

BY

W. T. SEDGWICK,

Professor of Biology

H. W. TYLER,

Professor of Mathematics

at the Massachusetts Institute of Technology

The history of science is as engrossing as the history of Greece and Rome and gives as sure an indication of the growth of civilization as does the history of philosophy, art, literature, or music.

The literature of science has always been more or less technical both in the subject matter and the form of its presentation, and Professors Sedgwick and Tyler have rendered a great service to the lay reader as well as to the student in writing a history of the development of science from its remotest period, through the romance of Mediaeval astrology and alchemy to the tremendous achievements of the last centuries.

"A Short History of Science" is one of the first books of its kind in English and is the result of the authors' many years of joint teaching of the subject. It is a book which will prove of the greatest value to Universities, Colleges, Scientific and Technical schools, and is especially adapted to general reading and reference.

With Appendices and Illustrations. Cloth, 8vo, \$2.50

THE MACMILLAN COMPANY

PUBLISHERS

NEW YORK

The Journal of General Physiology

EDITED BY

JACQUES LOEB, New York

W. J. V. OSTERHOUT, Cambridge, Mass.

The Journal of General Physiology is devoted to the explanation of life phenomena on the basis of the physical and chemical constitution of living matter.

The Journal of General Physiology is issued bimonthly, one volume of about 600 pages appearing in a year. Contributions should be addressed to the editors of **The Journal of General Physiology**, The Rockefeller Institute for Medical Research, Avenue A and 66th Street, New York, or 60 Buckingham Street, Cambridge, Massachusetts. The papers should preferably not exceed twenty printed pages, not counting the space occupied by illustrations. Authors receive one hundred reprints of their papers free of charge; additional copies may be obtained at cost.

Subscription price per year (one volume), \$5.00

CONTENTS OF VOLUME I, No. 6, JULY 20, 1919

CROZIER, W. J. Intracellular acidity in *Valonia*.

CROZIER, W. J. On the control of the response to shading in the branchiæ of *Chromodoris*.

SWINGLE, W. W. Iodine and the thyroid. III. The specific action of iodine in accelerating amphibian metamorphosis.

NORTHROP, J. H. The effect of various acids on the digestion of proteins by pepsin.

MOORE, A. R. The respiratory rate of the sciatic nerve of the frog in rest and activity.

FRED, E. B. The growth of higher plants in soils free of microorganisms.

FRED, E. B., and HAAS, A. R. C. The etching of marble by roots in the presence and absence of bacteria.

MORGAN, T. H., and BRIDGES, CALVIN B. The inheritance of a fluctuating character.

BRIDGES, CALVIN B. Vermilion-deficiency.

HECHT, SELIG. The nature of the latent period in the photic response of *Mya arenaria*.

HECHT, SELIG. The effect of temperature on the latent period in the photic response of *Mya arenaria*.

LOEB, JACQUES. The physiological basis of morphological polarity in regeneration. II.

LOEB, JACQUES. The influence of electrolytes on the electrification and the rate of diffusion of water through collodion membranes.

BIOLOGICAL SPECIALTIES

Our staff is made up of Biologists. We specialize along Biological lines, and we limit ourselves to these lines.

CATALOGS

Now Ready

Ready in May, 1919

1. MICROSCOPE SLIDES (List 3)

Made by expert technicians in our own laboratory.

2. LIFE HISTORIES (Catalog B)

Insects, Fishes, Amphibia and Reptiles.

3. MATERIALS (Catalog A)

Live and preserved animals and plants. Also Embryological material of all kinds.

1. BIRDS

Skins, mounts, nests and eggs. Includes taxidermist's supplies.

2. LANTERNSLIDES

Mostly original photographs. Birds, insects, etc. etc.

Ready Summer 1919

1. LIVE ANIMALS AND PLANTS

All kinds for laboratory, etc.

2. FOSSILS AND MINERALS

3. APPARATUS FOR BIOLOGY

We are at your service: Many Biologists are making good use of us now. We will handle your orders with biological intelligence and with dispatch.
